

Young Peoples 'Mental Health' Apps Audit (03.09.18)

The following information represents an overview of the current NHS 'approved' Apps available or under review on the NHS website for 'Mental Health'. Further details of these and other apps can be found at (<https://apps.beta.nhs.uk/>).

NHS 'APPROVED' / 'Being Tested' but available

ICON	NAME / FUNCTION	DESCRIPTION	EVIDENCE BASE & RESEARCH	STATUS	COST
	<p>COVE</p> <p>Mood Journal, Music Therapy.</p> <p>Emotion regulation / Emotional Expression</p>	<p>Users create music to capture their mood and express how they feel. Instead of words, users create music to reflect emotions like joy, sadness, calm and anger. They can store their music in a personal journal, or send them to someone and 'let the music do the talking'. Cove is like a mood journal, except instead of using words to express how they feel, users use music.</p> <p>To create music, users choose from six different moods – calm, struggling, longing, playful, clouded and gentle. Once users have selected their mood, they can easily add and remove different musical effects. They can store their music in a private journal and add personal thoughts and tags.</p>	<p>None available</p>	<p>Currently Being Tested in the NHS</p> <p>Available in app store IOS.</p> <p>Age 4+</p>	<p>Free</p>
	<p>Be Mindful</p> <p>Mindfulness, MBCBT</p> <p>Stress / Anxiety / Depression</p>	<p>The Be Mindful course is an easy-to-follow web-based training programme that guides users through all the elements of mindfulness-based cognitive therapy.</p> <p>Users complete 10 online sessions lasting 30 minutes each that consist of videos and interactive exercises led by leading mindfulness trainers (4 week course). There are also guided meditation audio downloads, guides on how to practice mindfulness in users daily life and online tools to review their progress.</p>	<p>Website states "Course completers showed" . . . ;</p> <p>58% reduction in anxiety (GAD-7)</p> <p>40% reduction in stress (PSS)</p> <p>57% reduction in depression (PHQ-9).</p> <p>25% decrease in rumination</p> <p>26% reduction of chronic fatigue</p> <p>33% improved sleep quality</p> <p>References:</p> <p>Krusche, Adele, Eva Cyhlarova, and J. Mark G. Williams. "Mindfulness online: an evaluation of the feasibility of a web-based mindfulness course for stress, anxiety and depression." <i>BMJ open</i> 3.11 (2013): e003498</p> <p>Krusche, A., Cyhlarova, E., King, S., & Williams, J. M. G. (2012). <i>Mindfulness online: a preliminary evaluation of the feasibility of a web-based mindfulness course and the impact on stress.</i> <i>BMJ open</i>, 2(3), e000803</p>	<p>NHS 'approved'.</p> <p>Web-based application. Accessed through phone, tablet or computer.</p> <p>Hugo Metcalfe (Trainee Clinical Psychologist)</p>	<p>£30.00</p>

	<p>Cypher</p> <p>Anonymous sharing and support network.</p>	<p>Cypher (formerly Silent Secret) is an anonymous peer-to-peer social network.</p> <p>Users can;</p> <ul style="list-style-type: none"> - Anonymously share thoughts & feelings - Post comments, 'hugs', 'hearts' or 'me2s' on what others share. - Instant message others in their support network - Use the 'Get support' function to connect with other support organisations. - Pick a virtual pet that gets happier the more good they do. 	<p>None available</p>	<p>Currently being tested by the NHS.</p> <p>Available in App Store on IOS & Android.</p> <p>Age 12+.</p>	<p>Free</p>
	<p>Calm Harm</p> <p>Distraction, DBT</p> <p>Self-Harm Prevention</p>	<p>Calm Harm is an app designed to help people resist or manage the urge to self-harm.</p> <p>Calm Harm is based on the principles of dialectical behaviour therapy (DBT). The app provides tasks that encourage users to distract themselves from urges to self-harm and help manage their "emotional mind" in a more positive way. Marketed as an aid to treatment.</p>	<p>None available.</p> <p>Positive user feedback on Appstore.</p>	<p>NHS 'approved'.</p> <p>Available in the App store. IOS & Android</p> <p>Age 12+</p>	<p>Free</p>
	<p>FearFighter</p> <p>CBT</p> <p>Phobias / Panic / Anxiety</p>	<p>FearFighter is an online course for people who struggle with phobias, panic or anxiety.</p> <p>Based on cognitive behavioural therapy (CBT). The course is divided into nine sessions. Each session takes about 50 minutes. You are advised to do one session a week. Challenges avoidance behaviors that characterize panic and phobia.</p> <p>The course features videos, exercises, downloadable & printable content and homework. Users encouraged to fill in questionnaires each week to plot their progress.</p>	<p>Only app endorsed by NICE for treating anxiety. Strong RCT evidence-based. Evidence of similar outcomes to clinician input or low level 1:1 CBT.</p> <p>References; Bachofen, M; Marks, IM; Mataix-Cols, D; Scheider, AJ. (2005). Internet-guided self-help with or without exposure therapy for phobic and panic disorders, <i>Psychotherapy and Psychosomatics</i> 74(3):154-64</p> <p>Gega, L; Marks, IM; Norman JJ. (2007). Computer-aided vs. tutor-delivered teaching of exposure therapy for phobia/panic: Randomized controlled trial with pre-registration nursing students, <i>International Journal of Nursing Studies</i> 44(3):397-405</p>	<p>NHS 'Approved'</p> <p>Available in App store. IOS & Android</p>	<p>Free on referral in some services</p> <p>Private Purchase: £99 - 179</p>

	<p>Big White Wall</p> <p>Online peer support.</p>	<p>Big White Wall is an online community for people aged 16+ who are stressed, anxious or feeling low. The service has an active forum with round-the-clock support from trained professionals. Users can talk anonymously to other members and take part in group or one-to-one therapy with therapists.</p> <p>Members can share experiences, express themselves in images by making a 'brick' in the wall, and access a range of guided group support courses on topics including managing anxiety and depression, positive thinking and problem solving. There is also a range of self-administered clinical tests, guides and tips to improve wellbeing, including articles on self-esteem, sleep, relationships and many more.</p>	<p>Evidence produced by BWW suggests 95% of members 'feel better' after using Big White Wall, and 73% share an issue for the first time.</p> <p>Positive user feedback.</p>	<p>NHS 'approved'.</p> <p>Available on App store IOS & Android</p> <p>Age 16+</p>	<p>Available on referral in some NHS services (Inc. HPFT)</p> <p>£9.99 per month for 6 month private subscription.</p>
	<p>Catch It</p> <p>CBT</p> <p>Low Mood / Depression</p>	<p>Users learn how to manage feelings like anxiety and depression.</p> <p>App uses cognitive behavioural therapy (CBT) to help users change the way they think and feel about things.</p> <p>Users can record their mood in three steps: 'Catch It' records and rates users' mood. 'Check It' asks users to take a moment to reflect on what they're thinking. 'Change It' asks users to think about a better way of dealing with a problem.</p> <p>Marketed as not being a substitute for professional mental health care.</p>	<p>Research suggests that users tend to use the app repeatedly and 84% of user-generated content was consistent with the basic concepts of CBT.</p> <p>Also demonstrated statistically significant reductions in negative mood intensity and increases in positive mood intensity.</p> <p>Reference; Kinderman, P., Hagan, P., King, S., Bowman, J., Chahal, J., Gan, L, ... & Tai, S. (2016). The feasibility and effectiveness of Catch It, an innovative CBT smartphone app. <i>British Journal of Psychiatry Open</i>, 2(3), 204-209.</p>	<p>NHS 'approved'.</p> <p>Available in App Store. IOS and Android</p> <p>12+</p>	<p>Free</p>

	<p>ieso</p> <p>1:1 CBT</p>	<p>ieso is an online course using instant messaging for people with mental health problems. The confidential service puts users in touch with a therapist trained in cognitive behavioural therapy. The therapy is by text so users can review sessions at any time.</p> <p>Users are matched with a therapist who will contact them to introduce themselves and arrange your first appointment.</p> <p>Appointments are either 30 or 60 minutes long and can be scheduled for any time of the day, including evenings and weekends. Length of treatment depends on need. Users have between four and 12 therapy sessions.</p> <p>Therapists deliver cognitive behavioural therapy (CBT) to patients in real-time through written conversation online, using a secure virtual therapy room. Therapy is confidential and discreet, accessible from their computer, tablet or smartphone. This allows flexibility, with appointments able to be scheduled for any time of the day, including evenings and weekends.</p>	<p>Reported by ieso;</p> <p>Nearly 17,000 patients have been treated in 100,000 hours of therapy with the app and evidence that it can reduce treatment time by 50 per cent.</p> <p>A record of delivering better than average recovery rates with fewer missed appointments.</p>	<p>NHS 'approved'.</p> <p>Free for NHS patients in;</p> <p>Buckinghamshire / Cambridge / Camden / Croydon / Dorset / East Riding of Yorkshire / East Sussex / Enfield / Gloucestershire / Hampshire / Lincolnshire / Medway / Merton / Mid Essex / Milton Keynes / Oxford Health Care / Somerset / South Essex / Southampton / Southwark / Surrey / Wandsworth / West Kent / West Sussex</p>	<p>Free</p>
	<p>Stress & Anxiety Companion</p> <p>CBT, Distraction</p> <p>Anxiety</p>	<p>Stress & Anxiety Companion helps users handle stress and anxiety on-the-go. It provides tools like breathing exercises, relaxing music and games. Goals is to help users change negative thoughts to help them better cope with life's ups and downs.</p>	<p>None available</p>	<p>NHS 'approved'.</p> <p>Available in App store, IOS & Android</p>	<p>Free</p>

	<p>SilverCloud</p> <p>CBT</p> <p>Anxiety / Depression / Eating Disorders /</p>	<p>SilverCloud is an online course to help people manage stress, anxiety and depression. Users work through a series of topics selected by a therapist to address specific needs. The eight-week course is designed to be completed in users own time and at their own pace.</p> <p>SilverCloud uses cognitive behavioural therapy (CBT) to help users change the way they think and feel about things. The therapist check's in about once every two weeks during the course to review users' progress. Users have full access to SilverCloud for one year.</p>	<p>Strong evidence base; Clinically led full randomized control trials (RCT) have demonstrated that SilverCloud Health's programs are extremely effective, engaging with patients and providing positive clinical outcomes that are on par with face to face therapy</p> <p>The SilverCloud Health platform is currently used by over 120 healthcare organizations across North America and Europe.</p>	<p>NHS 'approved'.</p> <p>Downloadable from the website following referral.</p> <p>Android.</p>	<p>Only available on 'referral'</p> <p>Free</p>
	<p>Bluelce</p> <p>Mood diary, Stress reduction techniques</p> <p>Self-Harm / Emotional Regulation</p>	<p>Bluelce is an app to help young people manage their emotions and reduce urges to self-harm.</p> <p>It includes a mood diary, a toolbox of evidence-based techniques to reduce distress and automatic routing to emergency numbers if urges to harm continue.</p> <p>Users access a mood wheel to track their mood and add notes on how they're feeling or what they're doing.</p> <p>The app offers a personalised set of activities designed to reduce distress including a music library, photo library, physical activities, relaxation and mindfulness exercises, and spotting and challenging negative thoughts. The app allows users to click on one of three options to either talk to a selected person in your phone contacts, ChildLine or 111.</p>	<p>Bluelce was developed by Paul Stallard from Oxford Health NHS Foundation Trust & co-produced by young people with lived experience of self-harm.</p> <p>After trialling Bluelce for 2 weeks 93% of young people wanted to use it and after 12 weeks 89% wanted to keep it. At the end the 12 week trial there were significant reductions in symptoms of depression and anxiety & 73% of young people who had been self-harming had either stopped or were harming less.</p> <p>References Stallard P, Porter J & Grist R (2018). <i>Acceptability, Use, and Safety of a Mobile Phone App (Bluelce) for Young People Who Self-Harm: Qualitative Study of Service Users' Experience</i>. JMIR Mental Health 2018; 5(1):e16</p> <p>Stallard P, Porter J & Grist R (2018). <i>A Smartphone App (Bluelce) for Young People Who Self-Harm: Open Phase 1 Pre-Post Trial</i>. JMIR Mhealth Uhealth 2018; 6(1):e32</p>	<p>NHS 'approved'.</p> <p>Available 'on referral' in some NHS services.</p> <p>Download from Bluelce website. IOS & Android</p>	<p>Only available on 'referral'</p> <p>Free</p>

	<p>Chill Panda</p> <p>Relaxation</p> <p>Anxiety / Stress</p>	<p>Helps users to relax, manage their worries and improve their wellbeing. The app measures user's heart rate and suggests tasks to suit their state of mind. Tasks include simple breathing techniques and light exercises.</p> <p>Chill Panda uses the camera on a smartphone or other mobile devices to capture users' heart rate (LED light to measure blood flow).</p> <p>Asks users to their mood and encourages them to take part in a variety of playful tasks and activities, including breathing and light exercise.</p>	<p>None available. Website states that research is currently underway.</p> <p>Limited user feedback on the app store.</p>	<p>Currently Being Tested in the NHS</p> <p>Available in the App Store, IOS & Android</p> <p>Age 4+</p>	<p>Free</p>
	<p>Rally Round</p> <p>Support from carers and family.</p>	<p>Rally Round is a free and secure online tool that allows parents, other family members, friends and carers to organise support for a child.</p> <p>Enables users to create private online support groups so they can get support from other family members and trusted friends.</p>	<p>None available</p>	<p>NHS 'Approved'.</p> <p>Available on App store, IOS & Android</p>	<p>Free</p>
	<p>Beat Panic</p> <p>Flash cards, self-soothing.</p> <p>Panic, Panic attacks</p>	<p>The Beat Panic app uses a series of soothing coloured flash cards with messages designed to help users overcome a panic attack in a calm, gentle manner.</p> <p>Users can:</p> <ul style="list-style-type: none"> • Focus on something else instead of the panic or anxiety • Learn breathing techniques. • Manage the urge to flee • Identify unhelpful thoughts. 	<p>None available</p>	<p>NHS 'Approved'</p> <p>Available on App store, IOS</p> <p>Age 12+</p>	<p>£0.99</p>

	<p>Feeling Good</p> <p>CBT</p> <p>Self-esteem, Resilience, Confidence</p>	<p>Feeling Good uses relaxation, cognitive behavioural therapy (CBT) and resilience building techniques from sport to help improve positive feelings, self-esteem and self-confidence.</p> <p>To get you going, the app offers 4 free audio tracks combining soothing music with gentle coaching.</p> <p>The main offering is the 12-track Positive Mental Training audio programme.</p> <p>The app allows users to set reminders to listen to the tracks, as repeated listening is believed to build resilience and help reinforce the skills learned in the programme.</p>	<p>None currently available. Refers to techniques of Positive Mental Training and associated positive outcomes.</p>	<p>Currently being tested by the NHS.</p> <p>Available on App store IOS & Android.</p> <p>Age 12+</p>	<p>Free</p>
	<p>iPrevail</p> <p>1:1 counseling support.</p> <p>Depression, Anxiety, Distress</p>	<p>iPrevail is a private chat forum for users to connect with a Trained Peer Counselor. Users can choose from a list of Peer Counselors who offer “kind and respectful support”.</p> <p>After an initial assessment, iPrevail will provide you with a treatment programme that fits your needs. Interactive lessons and tools help you understand how to tackle feelings of depression or anxiety, and you can use the app to track your mood and behaviour.</p>	<p>None currently available.</p>	<p>NHS ‘Approved’</p> <p>Available on App store, IOS</p> <p>Age 12+</p>	<p>Free</p> <p>Premium - £9.49</p>

	<p>My Possible Self</p> <p>CBT, Thought monitoring, Positive Psychology.</p> <p>Anxiety, Depression.</p>	<p>My Possible Self brings together content from a range of sources to support users to learn how to improve their thoughts, feelings and behaviour in an 8 week program. The app has three key aspects.</p> <p>Modules Users can access content from the Black Dog Institute; this series of simple learning modules gives you the skills to live a healthier, happier life. Topics include Managing Fear and Anxiety, Managing Stress and Overload, Tackling Unhelpful Thinking, Building Happiness and Wellbeing and Solving Problems.</p> <p>Moments Users use an online diary to capture their daily thoughts, feelings and experiences using text, images and emoji.</p> <p>Tracking Users can monitor up to three symptoms they are experiencing to better understand their feelings and recognise behaviour patterns.</p>	<p>None currently available. Promotes evidence base of CBT, Positive psychology and interpersonal psychology</p>	<p>Currently being tested by the NHS.</p> <p>Available on App store IOS & Android.</p> <p>Age 18+</p>	<p>Free</p>
	<p>MyCQ</p> <p>'Brain Training', Memory, Concentration, Achieving goals.</p> <p>Low motivation, concentration</p>	<p>MyCQ describes itself as a 'Cognitive Fitness App'. Users complete a 15 minute test to create a personalised training program. Users are encouraged to spend 15 minutes per day completing the 'Brain Training'.</p> <p>In addition users are provided with resources for healthy eating, sleep hygiene and increasing activity.</p>	<p>None currently available.</p>	<p>NHS 'Approved'</p> <p>Available on App store, IOS</p> <p>Age 4+</p>	<p>Free, with in app purchases.</p> <p>1 Month Subscription £8.49</p> <p>1 Year Subscription £79.99</p>

	<p>Thrive</p> <p>CBT, Mood Diary, Relaxation techniques</p> <p>Stress, Low Mood, Anxiety.</p>	<p>Thrive allows users to track their mood and learn skills to manage stress and anxiety using interactive games.</p> <p>Users also earn relaxation techniques including meditation and breathing exercises and muscle relaxation.</p> <p>Users can use the 'Thought Trainer' to identify and begin to challenge 'negative thoughts'.</p>	<p>Developed with University of Roehampton focused on continuously improving engagement and efficacy.</p>	<p>NHS 'Approved'</p> <p>Available on App store, IOS</p> <p>Age 12+</p>	<p>Free</p>
