

New Science Facilities Autumn 2019

Buy-an-Element Fundraising Campaign

Beaumont's Science Department develops our students' knowledge and understanding of the world around them, including their place within it and the important contributions of Science in shaping the modern world.

Curiosity is encouraged and we give students the confidence and tools both to ask questions and find answers for themselves, instilling a passion for Science which leads many students to pursue the subject to a high level.

Autumn 2019 brings exciting times at Beaumont with the building of a new Science Block which will provide twelve laboratories and six new teaching rooms.

We are inviting you, therefore, to purchase your very own limited edition 'element' professionally produced with your name(s) which will become part of our Periodic Table Wall Art. This will be displayed in the new building and will be your legacy to the Beaumont School Science Department Project. We are aiming to raise £6000 through this project towards equipment so as to be able to continue to deliver an outstanding Science education and promote the importance and impact of STEM within our own students and the local community.

We are hoping that you will be able to support us with a minimum donation of £50 per element. You can buy a dedicated element as an individual, family, group of friends or even for your form or year group.

Elements can be purchased via the link [Sponsor an Element](#) or visit beaumontschool.com/what's on.

A number can be selected on a first come first served basis and will automatically be matched to an element selected at random. Your message to go on the element must be a maximum of 20 characters (including spaces).

If you have any questions, please contact the Finance Department on 01727 732997 or finance@beaumont.school

In recent years the Beaumont Science Department has experienced a great deal of success in spite of limited resources and in a time of increasing demand on shrinking school budgets. The Science Department is the largest in the school and students benefit from a team of highly qualified, enthusiastic and forward thinking teachers who are committed to enabling all students to progress in their knowledge and understanding of Science within the classroom and beyond.

Let's continue to work together to ensure an education at Beaumont for its students that goes "beyond outstanding".
