

The COVID-19 lockdowns that we have recently experienced have challenged our culture, norms and values.

You are going to make a research poster to explain how.

Sociology and the Pandemic

I would like you to do some research and comment on the way the government policies of social isolation/lockdown during the COVID-19 pandemic, have had an impact on each of the following:

- **The way in which domestic chores are shared**
- **The experience of childhood**
- **Education**
- **Crime and deviance (think both online and in the community)**

For each point share your thoughts making sure you have a clear chain of reasoning explaining your ideas for each one.

Sociology and the Pandemic

I would like you to present your ideas in the form of a research poster. This can be over 1-2 pages of A4 on the computer (printed out), or you can write it/draw it. You can set it out as a mind map/sections/table - anyway you feel is visually appealing and can communicate the information effectively.

Include pictures and think about colours and **FONTS** to make it visually appealing.

Over the next few slides I have included some articles to help you get started. Please use these **ALONG WITH YOUR OWN RESEARCH!**

The way in which domestic chores are shared
