Dear Parents/Carers of Year 10 students,

New online Maths learning programme

We would like to inform you of a new online Maths learning platform that our students can access for the next year. Our students have enrolled on Complete Maths TUTOR, which has involved completing a diagnostic quiz to help identify any gaps in their knowledge and getting set up on an appropriate course.

What is Complete Mathematics TUTOR?

TUTOR covers every level of Maths from learning to count all the way up to calculus. TUTOR breaks Maths topics down into 'Goals' that together make up the whole Map of Maths. Every Goal follows the same learning sequence. Based on evidence of how students learn and drawing on the neuroscience of memory, TUTOR can assess the underlying knowledge needed for each point on the map, and then through expert instruction, practice questions and quizzing, make sure that point is learned and remembered. Each Goal can be completed in around 20 minutes.

TUTOR contains over 1600 Goals, so there will always be a new topic for pupils to explore! This week in lessons students have completed the diagnostic quiz in school and now have a starting course added to their dashboard, but they can always add additional courses on top.

How can I support my child using TUTOR?

You can support your child by encouraging them to log in from home and work through the videos and quizzes available to them.

Your child's teacher can also see how many quizzes they have completed, and which courses they are working on — this means teachers can use the information from TUTOR to support your child in their maths lessons even more effectively. Teachers may set a number of Goals as a home learning task from time to time.

Setting up a parent account

You are able to set up a parental view account which allows you to see what your child has completed and what courses have been set. There is a link to a short video below to demonstrate what this looks like. You can create your own parent account by going to <https://tutor.completemaths.com/register>

- [Parent view demo video](#)

Support the TUTOR Movement

The Complete Mathematics TUTOR movement is simple: all students should be able to access tuition in mathematics, regardless of their background or socioeconomic status. With the support of parents who can afford it, we can deliver the benefits of tuition to every single pupil by paying it forward to those in need.

At Beaumont we have organised all students in Year 10 to have access to this platform for a year. However you could consider funding your child's account for £1 a week. This request supports the mission of Complete Maths to offer free tuition to pupils and parents who cannot afford it. If you wish to do this you can select "I am happy to pay" when you set up your account. All students at Beaumont will have access to this platform so your child will not lose out no matter what option you choose.

We look forward to using Complete Maths TUTOR to further support your child's mathematical journey at Beaumont School.

Mrs A Benn (Head of Maths)
