

A New Era

Over the past decade, the Beaumont School site has been transformed.

Phase 1 was the addition of all-weather pitches, a multi-use games area and three, full sized grass sports pitches. In Phase 2, we opened a four court sports hall complex, incorporating a 30 station fitness suite. Within this new build programme, we created new reception and admin areas, as well as eleven additional, IT enhanced classrooms. Alongside the major refurbishment of some of our older buildings, Phase 3 included the building of a new Science Block, comprising 12 laboratories and six additional teaching rooms.

In 2020, we opened a new pavilion dining area for students, added a new hard-surface playing area for break and lunch time and redesigned the Science Garden as part of a student-led, ongoing rewilding and sustainability project.

This year, we have undertaken extensive work to make our heating systems more energy efficient and refurbished some of our open spaces and Technology facilities.

Looking to the future, the realisation of our long-held ambition to create a Beaumont Arts Centre, including a new Assembly Hall, is in sight and we look forward to welcoming you to this 'state-of-the-arts' new facility in due course ...

A New Era
