

This is what **INDEPENDENT LEARNING** looks like in

CTEC IT - YEAR 13

AFTER EVERY LESSON

1. Complete ALL coursework tasks set each week for Unit 21 Website creation
 2. Complete ALL coursework tasks set each week for Unit 8 Project management
 3. Complete ALL coursework tasks set each week for Unit 6 Application Development
- All tasks will be set on Google classroom and need to be complete for a Distinction* grade.

WEEKLY

It is important that you are completing weekly home learning tasks. These tasks will be varied throughout the year. Some will be focused on consolidating what you have learned in lessons via Exam questions on Google classroom, some will involve wider reading and note taking to prepare for your next lessons.

Make sure that you complete weekly home learning tasks promptly to avoid falling behind. Embed your understanding with review and practice activities:

- Check Home Learning and preparation tasks are completed and submitted as requested. Check for (and complete) any missed work due to being absent from school.
- Use CS Newbs to practice exam questions for each topic

REGULARLY

EVERY 2-3 WEEKS

Revisit, Revise and Review - read posts and watch videos on previous topics to help you review and revise the previous two weeks of work:

- Watch videos on MrBrownCS then CTech to check understanding on topics.
- Use CS Newbs to complete any missing notes and practice questions for each topic.

PERIODICALLY

AT LEAST ONCE EVERY HALF TERM

- Complete past papers/questions and use the mark schemes to self-assess your work - This will give you the necessary practice of exam skills which have been used in class and will give you more confidence when it comes to approaching the real thing.
